

# Parent-Child Creativity Workshop

(PGSCRE021920)

<p><b>Introduction</b></p>	<p>Many parents are not aware that they play a key role in promoting and developing children's creativity. However, they may agree that many children tend to be less creative or become less curiosity when they grow older. What has hindered their children's creativity? How can parents encourage their kids' creativity?</p> <p>Creativity (meaning the ability to make successful creative products) refers to a very complicated set of attitudes and skills a person has to own to become a successful creator/entrepreneur. Having lots of creative idea (divergent thinking) is just the first step in the journey towards creativity.</p> <p>The Parent-Child Creativity Workshop as an effective interactive platform is designed to offer creative activities that both parents and children can demonstrate their creativity. During this workshop, they should understand the positive influences of parent-child communication and a creative environment in building up children's creativity. Parents can appreciate more their child's creative potential and develop more confidence in building their child's creative thinking and capacity.</p>
<p><b>Programme Type / Level</b></p>	<ul style="list-style-type: none"> <li>❖ Parent-Child programme / Introductory level</li> </ul>
