

Crime Scene Investigation (SCIP2321)

Introduction

Law enforcers do not have a time machine to travel back in time to witness the crime or the accident. Nevertheless, they still find out what exactly happened at the crime scene with forensic science. In this programme, students will learn about various common forensic techniques, such as fingerprint analysis, teeth analysis, bloodstain pattern analysis, etc. Students will apply those techniques in a sample case with crime scene mysteries waiting for you to solve.
