

On the Same Coast (SCIP1261)

Introduction	<p>There are different kinds of habitats across Hong Kong. The animals and plants in every habitat have their unique adaptation characteristics for their survival. In this programme, two habitats will be visited: Rocky Shore and Muddy Shore. Students will have field trips to study the environment and organisms living there. They will do some on-site ecological sampling to compare and contrast two habitats to find out how human activities affect the ecology. This programme is co-organized with Cheung Chak Shan College.</p>
