

Spectrum of ICT Blueprint

(E2GSG030W)

Introduction	<p>Information Communication Technology (ICT) has significantly changed the way people live, work, communicate and learn. Careers in information and communication technology fields include a variety of roles and tasks associated with planning, researching, design, develop, implementing, installing, protecting and monitoring of IT systems as well as infrastructure. At this workshop, the speaker, Mr Stanley Ng will share his workplace experience in ICT accumulated over the years and introduce the ICT career pathways.</p> <p>Mr Stanley Ng is a seasoned ICT executive with expertise in business and digital transformation, portfolio-program-project (P3O) management, business architecture, application/solution architecture and business application implementation, managing programs/projects ranging from small projects of US\$1million to mega-projects of more than US\$50million. He is Senior Vice President of PCCW Solutions managing a CMT workforce of 400 members serving the major client HKT, which is a Hong Kong telecommunication service provider offering unique quadruple-play experience with fixed line, broadband, mobile communication and media entertainment services.</p> <p>Prior to joining the PCCW/HKT Group, Mr Ng had been engaged in business and IT consulting for 17 years with 12 years in IBM Global Business Services managing or delivery business transformation, process re-engineering and ERP system implementation projects of different natures in various industries. His business knowledge and application experience spanned across supply chain, manufacturing, finance and accounting, and telecom domains (BSS/OSS, digital channels, campaign, retails, contact/service centre, business performance, analytics, etc).</p>
