

Inside Out Series: Self-Management III

(F2IOS007W)

Introduction of the Workshop

Learning styles refer to students' preferred physical and socio-psychological conditions and preferred learning methods (Dunn & Griggs, 1988). It is not surprising that gifted students have varied learning styles. When teaching style and learning style are at odds, problems may occur. Many of us may feel frustrated and uncomfortable in the classroom because of our sensitivities and priorities related to learning. While some resist the teaching styles that do not match their preferences, the others accommodate to fit in the system.

The workshop helps participants understand why they appreciate some teachers more than others and why they are having trouble in some classes. We will also examine participants' time management skills - the capacity to estimate, allocate, and execute within time constraints. Some overcommitted gifted students involve in many different activities, these students may easily get into a heated argument with parents on their time management. Therefore, prioritisation and limitation on their activities could help these students with multipotentiality to balance their busy student life. The strategies of prioritisation will be discussed in this session.

Introduction of the Series

The 'Inside Out Series' is a workshop series related to affective education, it covers topics like self-concept, self-management and social relationships of gifted students. This series aims at fostering gifted students' whole-person development from the inside out by enabling them to understand themselves, enhance their self-management skills, and eventually build positive social relationships with the outside world. In the workshops of the Self-Management Series, you will learn how you are influenced by conformity, the difference between healthy and unhealthy perfectionism, some emotional, stress and time management skills etc. If you are interested in understanding self-management, don't miss this opportunity. You are also encouraged to complete the whole series for mastering the self-management skills progressively.
