CGMO  
Training 2022

PHASE I

$$6x+3y=12$$

$$6x+3\cdot 2=12$$

...

**Application Deadline**  
**31 Jan 2022 12:00 n.n**

**Result Release**  
**25 Feb 2022**

## **Intended Learning Outcomes**

Upon completion of the programme, participants should be able to:

1. broaden mathematical knowledge in a variety of areas on the basis of senior secondary mathematics curriculum
2. strengthen the problem solving and higher-order thinking skills
3. learn more about the scope of International Mathematical Olympiad Training

## ◆ Introduction

- An introductory level comprehensive mathematics programme which covers a wide range of topics
- Broaden students' mathematical knowledge and strengthen their problem-solving skills
- Consists of 3 phases
- Outstanding students in the programme will represent Hong Kong in China Girls Mathematical Olympiad (CGMO) 2022 held in summer

This programme is co-organized with International Mathematical Olympiad Hong Kong Committee (IMOHKC)

## ◆ Target Participants

- S1 to S6 HKAGE **female** student members
- Class size: 20

All applicants **MUST** attend the **Aptitude Test** held on **19 Feb 2022**.

Except for those who have

- a) completed any phase of International Mathematics Olympiad Training, CGMO Training or Introduction to Olympiad Mathematics before **OR**
- b) attended the Aptitude Test held on 15 May 2021, 21 Aug 2021 or 20 Nov 2021

Remarks:

- Due to the limited seats in computer rooms, students who have attended the Aptitude Test on 20 Nov 2021 would not be allowed to take the test on 19 Feb 2022. Their results on 20 Nov 2021 will be used for this programme.
- Students will be selected randomly in attending the Aptitude Test if the application is over-subscribed. Only selected students could join the Aptitude Test held on 19 Feb 2022.
- A notification email will be sent on **9 Feb 2022** for the application result of the Aptitude Test.
- All unselected students will be regarded as their application of this programme unsuccessful.

This programme is the same as CGMO Training 2020 (Phase I) (MATS1121) in 19/20 school year.

## ◆ Medium of Instruction

Cantonese with English handouts

## ◆ Pre-requisite

Students should know the basic knowledge of the following:

Quadratic Equations and Functions, Binomial Theorem, Mathematical Induction, Remainder Theorem and Factor Theorem, Arithmetic and Geometric Sequences, Circles and Trigonometry

## ◆ Aptitude Test

- Students who wish to apply for this programme must take a general aptitude test on **19 Feb 2022 (2:00 p.m. – 4:00 p.m.)**. Except for those who have attended the Aptitude Test held on 15 May 2021, 21 Aug 2021 or 20 Nov 2021.
- This general aptitude test consists of 100 multiple choice questions which covers a wide range of topics in mathematics. The purpose of the test is to figure out the applicant's knowledge in different fields of mathematics in order to choose the most suitable students for different programmes. Neither under-qualified nor over-qualified students will be admitted.
- The next aptitude test is tentatively scheduled on **14 May 2022**. The result of an aptitude test will be valid for one year. If a student takes the test more than once, the latest result will prevail. The following table lists the programmes for which the results of this general aptitude test will apply.

### Remarks:

1. All aptitude tests will only be arranged on the designated dates. No make-up test will be arranged.
2. No Calculator is allowed.
3. Please bring along with your Identification Card, e.g. HKID, student ID.
4. Please arrive at the venue 15 minutes prior to the Aptitude Test begins.

**If students who have selected to join the aptitude test are absent without any reasons and prior notification provided, it will result in a lower priority in joining the aptitude test next time when they apply.**

## ◆ Certificate

E-Certificate will be awarded to participants who have:

- attended **at least 7 sessions**; and
- completed all the assignments with satisfactory performance

Some of the applicants might be invited to attend the online interview to be held on 19 Feb. Applicants who are being invited will receive the email on or before 16 Feb (Wed).**

## ◆ Sample Notes

1. Do there exist 2017 consecutive positive integers, each of which has at least two prime factors?
2. Let ABC be an acute triangle and D, E, F be the feet of its altitudes. If P and Q denote the perimeters of  $\triangle ABC$  and  $\triangle DEF$  respectively, what are the possible values of  $\frac{P}{Q}$ ?
