

# Is an Aviation Career in your future?

(TECT1321)

## Introduction

The flight simulation programme enables youngsters to receive flight training safely, so that those who are passionate with flying can pursue their dreams and be prepared to become a pilot at an early age.

The talk will give an introduction on the flight simulation programme, which includes:

1. Training on eye-hand coordination
2. Understanding the aerodynamic theory through flight control
3. Multitasking on flight training
4. Instructing students to setup flight simulation training for practice at home.

講座

## Programme Type

Introductory Talk in Technology ([NON Token-required](#))

## Speaker

**Mr Simon Wong** is an expert in computer science. He has designed a motion flight simulator which can simulate temperance and landing to facilitate youngsters in learning flight skills. Mr Wong is experienced in providing flight training to students in Hong Kong using flight simulators and has facilitated them in getting Supervisor Solo /First Solo qualifications, which are recognised by airlines in Hong Kong.

Mr Wong was a flight instructor in the Hong Kong Air cadet Corp. from 2006 to 2013. He set up the Hong Kong International Aviation Association in 2014.
