

Chat Club (SIE/002)

Introduction

Chat Club is a forum-like activity where a group of students of different ages and interests will be allowed to discuss a common topic. The conversation will then be allowed to slowly and naturally evolve.

As the participants will have different interests and values, and varying degrees of understanding on a certain topic, during the discussion many different and interesting perspectives will be brought up. Thus, students will be expected to learn from each other and understand the different views and perspectives that different people might have on a certain topic.

A brief introduction and guiding questions will be supplied when necessary to facilitate and spur the discussion to aid in students' learning.

Discussion Topic

Many countries are investing a lot on space exploration and understanding the universe. However, Earth has been facing a lot of problems, such as climate change, extinction of species, etc. Should we focus on saving the Earth or focus on space exploration?

Programme Type

Student-initiated Event

Facilitators

Alvin Hung, Henry Hun, Carmen Chung (Students S6)

Target Participants

S2 to S6 HKAGE preliminary and full members
Capacity: 15
*First-come first served

Medium of Discussion

Bilingual (English and Cantonese)

Intended Learning Outcomes

Upon completion of the programme, participants will be able to:

1. Meet and communicate with students with a similar cognitive sophistication and similar interests
2. Discuss and hear different perspectives to increase their understanding and knowledge
3. Expand their social circle and develop their social and communication skills
