

Sciences Domain Sharing Session: A Gateway to the World of Sciences

Introduction

The HKAGE provides student members with vigorous learning opportunities by a great variety of programmes in Sciences Domain. The current Sciences Domain Curriculum Structure covers various topics in Physics, Chemistry and Biology. It is expected that the Curriculum Structure will help students select programmes that suit their abilities and interests, through which they can equip themselves well and develop the scientific spirit and knowledge to realise their full potential in the future.

This sharing session will provide details on Sciences Domain Curriculum Structure. Some student members and alumni are also invited to share their learning experiences in Sciences programmes.

Programme Subsidy Scheme (Mathematics and Sciences)

To encourage our student members to widen and deepen their learning experiences to meet their diverse needs, the HKAGE will start to subsidise student members enrolling in eligible gifted programmes held by the University Grants Committee (UGC) funded tertiary institutions from 2015 summer onwards. Please visit the HKAGE's website for more information.

Extended Student Development and Support Services

Secondary one preliminary student members (2015/16 admission) are encouraged to join the "**Peer Support Scheme: "Gifted" in Touch**" with HKAGE student mentors who will assist the new members to cope with the new learning environment and advise them on their learning journeys at the HKAGE. It will be a year-long scheme starting from September 2016 to August 2017. Mentee recruitment will start in late July 2016.

Speakers

- **Ms Brenda Liu** (Student Services Manager)
- **Mr Derek Ng** (Senior Student Development Officer of Sciences Domain)
- **Sciences Domain Sharing Student Members and Alumni**

Content

- Rationale of the HKAGE curriculum structure with new learning opportunities
